

"Net Investment Income Tax: International Implications"

Speaking Engagement

Garvey Schubert Barer, Second and Seneca Building

The Net Investment Income Tax ("NIIT") applies to income derived from U.S. and foreign sources. While foreign parties are generally exempt from NIIT, U.S. taxpayers with an interest in a foreign entity, foreign trust, or foreign estate will have NIIT consequences from such foreign interests. Tax relief in the form of the foreign tax credit or income tax treaties may result in unexpected complications in computing the NIIT. This roundtable will provide the practitioner with practical information with which to handle the international implications of NIIT for U.S. and foreign taxpayers.

We look forward to a lively discussion and hope to see you here.
