“A Continuing Magical Mystery Tour Through Subchapter S,” New York University 84th Institute on Federal Taxation (New York)

October 23, 2025 New York, NY

The latest version of Larry Brant’s white paper, A Continuing Magical Mystery Tour Through Subchapter S, is now well over 220 pages and contains a look at several of the obscure aspects of Subchapter S. His discussion at this year’s Institute on Federal Taxation (IFT) will cover many of the not-so-obvious provisions of the Code and regulations that impact Subchapter S corporations and their shareholders, including late or unfiled elections, eligibility, conversions and tax allocations.

The IFT is designed for the practitioner who must frequently anticipate and handle federal tax matters. Each year, it provides high-level updates, practical advice and in-depth analysis of the latest trends and developments from leading experts.

For more information, visit the NYU [Institute on Federal Taxation website](#).
